Mostafa Sakr

Front End developer

mostafasakr308@gmail.com +201010446219 Cairo, Egypt LinkedIn GitHub My Portfolio

SKILLS

Languages & Frameworks (JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express)

Tools & Technologies (REST, GraphQL, Socket.io , JWT, Server-Sent Events, Git, Github, GitLab)

Libraries (Redux, Redux Toolkit, React Query, Styled Components, Material UI, Ant Design, ShadCN)

PROFESSIONAL EXPERIENCE

PaySky - Fintech, *Senior Frontend developer* Feb 2026 – Present | Cairo, Egypt

Developing and maintaining frontend features for a large-scale multi-tenant e-commerce marketplace platform similar to Shopify, supporting multiple tenants and diverse business domains. Building highly customizable UI experiences per tenant through dynamic configurations, theming, and reusable components while maintaining consistency across applications. Working on tenant-specific workflows, feature flags, permissions, and access control systems to ensure secure and flexible user experiences.

- Contributing to a monorepo architecture that consolidates multiple company projects, improving code sharing, consistency, and development efficiency across teams actively involved in defining scalable frontend structure, shared UI libraries, and reusable business logic across applications.
- Ensuring high code quality and system reliability through unit testing, code reviews, and adherence to clean architecture principles. Promoting best practices across the team including reusable patterns, state management consistency, and performance optimization.

E2E County - Travware, *Senior Frontend Developer* May 2025 – Feb 2026 | Sheraton - Cairo

- Developed tourism applications handling large volumes of live data using Server-Sent Events (SSE) for real-time updates.
- Led a social media integration project connecting Meta (Facebook, Instagram, WhatsApp) and LinkedIn to manage pages, posts, ads, and campaigns; implemented role-based email management, interactive WhatsApp templates with media and buttons, and API-driven employee, customer, and email campaign workflows.
- Wrote unit tests using Jest and React Testing Library and maintained technical documentation covering integrations, workflows, and API interactions.
- Optimized Dart, a SaaS application, by refactoring frontend architecture, improving request efficiency, and using Next.js middleware to consolidate redundant backend ping requests into a single call.

Geek Labs, *Senior Frontend Developer / Frontend Team Lead* Mar 2024 – May 2025 | Cairo, Egypt

Developed and contributed to multiple web applications and SaaS platforms, focusing on scalable frontend architecture, responsive UI development, API integrations, and business workflow automation.

- MachineGenius — AI-Powered SaaS Platform: Developed frontend modules for AI-powered content generation, automated video production, and HR recruitment, including CV screening and ATS-like workflows.
- Street Sweet — Stock Market Alerts Platform: Developed a web application enabling users to follow stock market strategies, receive trading alerts, and access subscription plans and platform features.

Valintika, *Front End developer* Sep 2020 – Sep 2021 | Turkey

As a Frontend Developer, I designed and developed responsive, user-friendly web interfaces using **HTML**, **CSS**, **JavaScript**, and **jQuery**, ensuring cross-browser compatibility and optimal performance. I utilized **MVC architecture** to structure applications effectively and implemented **AJAX** for dynamic content updates and seamless data interaction. My role involved collaborating with backend teams to integrate APIs and deliver smooth user experiences while maintaining clean, reusable code.

Smart Vision, *Front End* Oct 2021 – Oct 2022 | Mansoura, Egypt

As a Frontend Developer, I was responsible for designing and implementing user interfaces, optimizing performance, and delivering responsive web applications using modern technologies like HTML, CSS, tailwind css, JavaScript, React.js, Next.js and restful APIs.

PROJECTS

Darts Booking Engine SaaS. (Next.js - Typescript)

- *Built a server-rendered, SEO-friendly white-label travel platform with domain-based theme auto-detection and full branding control.*
- *Delivered smooth booking flows for flights, hotels, tours, and custom packages with reusable UIs for B2C, B2B, and B2E channels.*
- *Contributed to a responsive admin dashboard for managing content, services, and themes.*

Sbaik - gold/silver store (MVC)

Sbaik is a specialized platform focused on the trading of gold and silver bullion, offering users a reliable resource for investing in precious metals. The platform not only facilitates trading but also promotes financial literacy by spreading awareness about the benefits of investing and saving in gold and silver. Through *Sbaik,* users can access valuable insights and guidance on how to diversify their portfolios with precious metals, making it an essential tool for both novice and experienced investors.

Qowa.ai - Penetration Testing SaaS Platform (Next.js - typescript)

Developed a responsive marketing website and client management system for a cybersecurity company specializing in penetration testing. Built client-facing workflows for organization and project management, security assessment coordination, vulnerability findings, exploit evidence, and remediation reporting. Supported integrations with GitHub, GitLab, and CI/CD-related workflows to streamline security assessment processes.

MachineGenius SaaS platform (Next.js - typescript)

Developed a modular, AI-powered SaaS platform streamlining content production, video creation, and recruitment through scalable web applications and intelligent integrations.

- AI Content Generation: Accelerated script writing, enabling content writers to produce 5–6+ scripts daily.
- Video Production: Built workflows to convert approved scripts into videos using customizable layouts, footage integration, AI-powered generation, and YouTube publishing.
- HR & Recruitment: Implemented recruitment management, CV parsing, applicant screening, and ATS-like workflows.
- Frontend Architecture & Integrations: Developed reusable components, responsive interfaces, modular features, and backend API/AI service integrations to automate workflows and support scalability.

StreetSuite - Stock Market Alerts Platform (React.js - typescript)

Developed a web-based stock market platform designed to help users follow trading strategies, receive stock market alerts, and make informed trading decisions. Implemented responsive user interfaces, subscription plan management, and API integrations to deliver a seamless user experience.

- Stock Alerts & Strategies: Built interfaces enabling users to follow trading strategies and receive stock-related alerts.
- Subscription Management: Developed UI workflows for subscription plans and platform features.
- Frontend Development: Created reusable components, responsive layouts, and maintainable frontend architecture.
- API Integration: Integrated backend APIs to support platform functionality and dynamic data rendering.

Right Decision (HTML - CSS - JavaScript)

Marketing Website a Saudi establishment specialized in customer experience that focuses on development and achieving results, providing high expertise specifically designed throughout the project lifecycle.

Liard for travelling (HTML - SCSS - JavaScript)

Landing page for travelling company

EDUCATION

Bachelor of computers and information, *Mansoura university* 2018 – 2022 | Mansoura, Egypt
